

Michigan Department of Health & Human Services

Hello Library Partners,

As the State of Michigan has embarked upon a new school year, and with the start of flu season there has been an overwhelming demand for COVID-19 at-home test kits. Due to this response to our programs, MDHHS has ordered additional test kits that will be available in November. Until those test kits arrive to our warehouse for shipment, we will be pausing our **Library Partnership for At-Home Test Program**.

In the interim, please let patrons of your library know the following:

- The United States government is offering free COVID test kits. Please visit the link below to order:
 - [Get Four Free At-Home COVID-19 Tests](#)
- You can also check the State of Michigan's Coronavirus website for a list of free COVID-19 testing sites in your area:
 - [Community Based Pop-Up Rapid Antigen Testing Events](#)

We have also attached a document with QR codes for the resources listed above that you can pass out or post for your patrons. Any additional questions can be directed to MDHHS-COVIDTestingSupport@michigan.gov. Thank you for your patience and understanding.

Respectfully,

COVID-19 Testing Collection and Coordination Team

Michigan Department of Health and Human Services | Public Health Administration
