# Colors of our Natural World

**Wednesday, August 6th**  
**11:00am**

**Live Animals!**

Dive into the vibrant realm of nature! Explore the rich diversity of colorful life that surrounds us. From the striking hues of flowers and butterflies to the dazzling shades of birds and fish, discover how plants and animals use color for camouflage, attracting mates, evading predators, and signaling danger. Witness the enchanting interplay of colors and learn how these vibrant shades contribute to their survival and prosperity in the wild.
